Безжичен геймпад Nacon Revolution Unlimited Pro Camo Gray

Модел : NC-PS40FPADREV3CAMO

Безжичен геймпад Nacon Revolution Unlimited Pro Camo Gray

The REVOLUTION Unlimited Pro Controller is NACON's first PS4® controller with a wireless mode. It also offers all the customisation features, both manual and via software, that competitive players need.

The sensitivity of the REVOLUTION Unlimited Pro Controller's sticks can be easily adjusted thanks to interchangeable heads (concave or convex) and shafts (different diameters). Additional weights can be added to the concealed compartments on each of the controller's handles.

Thanks to the integrated Bluetooth® receiver, you can choose between wired and wireless mode. It also includes a headset jack for chat and audio features in both communication modes. With the controls on the underside of the controller, you can quickly adjust the headset volume, game mode (1 - PS4®, 2 - PS4®-Advanced, 3 - PC-Advanced) and the controller communication mode. In PS4®-Advanced and PC-Advanced modes, you can access game profiles created with the included software. And with button mapping, left and right stick response curve, stick and axis inversion, dead zone sensitivity for each trigger, and vibration intensity, the customisation possibilities are endless.

You can even change the colour and brightness of the right stick backlighting for a truly personalised look!

The controller and all its accessories can easily be transported in the included rigid storage case.
