Модел : GL-KEY-GAKC-099

Суичове за механична клавиатура Glorious Panda, 36 броя

Суичове за механична клавиатура Glorious Panda 36 броя

The Glorious Panda is no ordinary mechanical keyboard switch. Created from the resurrected original INVYR Panda housing molds, with improved internals, and upgraded materials - the GP unlocks a transcendent tactile typing experience unlike anything your fingers have ever enjoyed. Engineered with the most premium materials sourced from around the world, this switch features buttery-smooth operation, perfectly tactile response - and a sweet-sounding "thock" like a song from the heavens. The feeling of a Glorious Pandas could be described as a very snappy and responsive tactile switch. They feature a strong 'bump' at the start of the downstroke, with a quick snap back to position in the upstroke. You notice less pre-travel, smoother operation, and a quicker snap back than it's "holy" cousin. Once you try it your fingers won't be able to get enough. The Glorious Panda is uncompromised quality. Below is a full breakdown of this glorious switch and how each one is created: Top Shell - Created from original Invyr tooling, modified to incorporate Glorious branding, made with premium grade polycarbonate Stem - New and improved Glorious stem that provides less pretravel for the tactile bump to occur and a stronger upward stroke. Composed of POM sourced from Japan. Spring - 67 gram stainless steel spring with nickel plating, sourced from Korea. Leaf - Premium grade copper, sourced from Japan Bottom Shell - Created from original Invyr tooling, 3 pins, using premium Nylon PA66 Glorious Pandas come unlubricated from the factory. Some users prefer to lubricate their switches for an extra smooth typing experience.

- Производител: Glorious
- Вид суич: Жълт
- Съвместими с GMMK клавиатури
- Съвместими с клавиатури използващи MX суичове
- Съвместими с MX капачки
