The Kolink ARGB 1-2 Splitter Cable allows users to extend one D-RGB source to two widely spread spaced accessories so that they can build an aesthetically beautiful lighting system. It features standard 3-pin addressable RGB headers and two male-male connector pins are also included in the packaging. The extender cable can be used with any standard 3-pin 5V RGB controller or any popular RGB sync technologies from all major motherboard manufacturers. The arrow marking on the 3-pin LED connector is to be aligned with the +5V marking on the D-RGB header.
