Пасивен охладител Jonsbo M.2 SSD

Модел : JONSBO-ZUWE-418

Пасивен охладител Jonsbo M.2 SSD

Jonsbo M.2 SSD пасивен охладител

The Jonsbo M.2 SSD cooler is a passive cooling solution for Next Generation Form Factor SSDs. It's no secret that the modern M.2 NVMe SSDs in particular tend to get a little warmer when they are used heavily, so that even the drive's speed has to be throttled. To counteract this problem and to be able to use the full performance, the professionals at Jonsbo developed a compact passive cooler that significantly reduces the temperatures of an M.2 SSD .

- Gray passive cooler for M.2 SSDs
- Subtle and elegant design
- Cooler temperatures to avoid throttling
- Compatible with M.2 NVMe SSDs (2280)
- Uncomplicated assembly
